

BLUEPRINT

ALABASTER

Since the last Comprehensive Plan was adopted in 2016, the City has grown to almost 33,500 and almost 12,500 housing units, and that growth is projected to continue. Alabaster is in need of a new Comprehensive Plan to guide decision-making for the next 10-15 years. Planning is crucial to prepare for future growth and development.

This action-based plan will focus on key areas such as new development, parks and recreation, future land use, transportation, natural resources, economic development, quality of life, and public facilities. The Comprehensive Plan typically takes 12 months to complete.

To ensure broad public input, various methods will be employed:

- **Project Website:** A dedicated website (www.BlueprintAlabaster.com) will provide project information, contact details, meeting announcements, presentations, and other materials.

- **Community Survey:** A survey will gather input on citizens' perceptions of public services, infrastructure, transportation, safety, parks, growth, and city services.
- **Online Mapping Tool:** An interactive tool will capture citizens' issues, needs, and ideas on a Google map, accessible via the web and mobile devices.
- **Public Meetings:** In-person meetings will allow citizens to provide feedback on key issues, development needs, and community desires.
- **Stakeholder Interviews:** Targeted discussions with specific segments or groups will enhance understanding of key issues shaping the city.

The new Comprehensive Plan will include:

- **Existing Conditions Report:** Analyzing population, demographics, housing, employment trends, and existing land use, zoning, and transportation components.
- **Future Land Use Map:** Replacing the 2016 map, it will guide the Planning and Zoning Commission in assessing new development proposals and making rezoning recommendations.
- **Topical Chapters and Recommended Actions:** Based on existing conditions and public input, recommendations will cover annexation strategies, code enforcement, new facilities, recreational amenities, economic development, infrastructure support, and transportation options.
- **Public Involvement Summary:** Providing an overview of outreach methods, survey results, and activities.
